

## Senior Web Developer

**Summary:** Tauck is looking for an exceptional web developer to add to our team. A successful candidate will be someone who can balance the need to be customer focused and provide quick resolution to business needs while at the same time implementing systems that are agile and adaptable. This position will be responsible for the programming design, testing, implementation and administration of digital technologies and applications. A successful candidate will partner cross departmentally to ensure technical solutions meet business requirements.

### Position Responsibilities:

- Directly interacts with business department leaders to identify requirements, and develop technical solutions. Candidate must be able to independently research potential approaches and recommend cost effective and reliable solutions.
- Effective planning, testing, implementation (coding) and administration of interactive technologies, websites, applications and social media platforms.
- Create, maintain and update internally and externally built websites, API's, mobile and social media apps.
- Assists the Web Development Manager in researching and identifying technology and external service providers which may provide an opportunity to grow Tauck's ebusiness.
- Provides day to day production and technical support of Tauck's website providing assistance to business users, resolving data and programming issues, and managing an efficient problem resolution and support process.
- Continuously monitors and evaluates the performance of web and related systems and strives to increase overall efficiencies and effectiveness of computer systems. Ensures that technical solutions and data are backed up and recoverable. Ensures website and external web services are secure and in compliance with regulatory requirements.

### Required Experience

- Bachelors' degree in Computer Science or equivalent combination of education and experience.
- 7-10 years of software development experiences that include the design, coding, testing and debugging.
- Working experience with the following technologies: Sitecore (including Helix and MVC), C#/.NET, ASP.NET MVC, NPM, jQuery, React, Handlebars, Redux, CSS, SASS, GIT & SVN, CI, SQL, DB2, and REST service architecture.
- Excellent debugging skills.
- Proven experience to successfully implement projects cross-functionally
- Maintains contemporary knowledge in the fast changing digital technology space.
- Excellent oral and written communication skills
- Penchant for detail
- Passion for travel a plus
